

SLIGHT RISES MADE ANN FRENCH BOURSE

Cheerful Tone Rules Despite Premier's Move Against Germany.

Special Cable to THE NEW YORK HERALD.
Copyright, 1922, by THE NEW YORK HERALD.

Notwithstanding Premier Poincaré's determination to enter into definite conflict with Germany on the apparently minor problem of prewar civil liberties, the French Bourse has maintained a cheerfully cheerful tone with continued but slight advances in several important lines.

This may be considered remarkable in view of the fact that the annual vacation period is now in full swing and provides an interesting commentary on the far reaching international movements which have been slowly but surely taking place since July 1. France's financial position takes on the following comparative aspect:

On one side, Germany continues to demand a moratorium on all cash payments; Russia refuses to recognize either her debts or private properties; the Allies persist in demanding that the payment of interest on their claims, and last but not least the exchange variations continue to appear adversely.

Yet simultaneously there has been steady house maneuvering with the definite opinion behind it that France is now on better terms with England than at any time since the armistice, and that the time is fast approaching when there will be a business boom of more important proportions. This belief is supported by the fact that the world is beginning to talk reasonably of the correction of the international debt and France's reparations problem, which is considered by the financial world as adequately proved by the Balfour note, despite its coolness of expression.

In addition, King Constantine's bluff has been called in the Near East and there is every reason to believe that a reasonable settlement of that problem is in the immediate perspective. Finally, it must not be overlooked that for the first time since 1913 the quantity of France's interior consumption has increased in her favor, and despite the variance of their political beliefs the workers are again showing a determined effort to work for the welfare of France.

Such important financial guides as the *Revue Financière*, while advising caution in investments, do not hesitate now to urge capitalists to bring their money from hidden places and employ it in their development of the country, and commerce. The greatest fear is that some of the younger post-war corporations will not prove sufficiently active in their development of the country, and fluctuations to be able to weather such storms, but most of these companies have ramifications leading into concerns of undeniable stability. And the bankers with their eyes on the pulse of business freely express the conviction that the nation is again about to show her basic financial stability.

FOUR PERSONS KILLED IN MOTOR ACCIDENTS

Two Men Dead as Result of Helping Others.

Two deaths in automobile accidents were reported yesterday. Herman Wasserman, aged 18, 1032 Third avenue, was helping a truck driver back out of the Reid Ice Cream Company garage at 79 East 122d street when he was crushed against a post, dying almost instantly.

Carl Wanner, aged 41, of Eagle Rock avenue, West Orange, N. J., having helped a man pull a car out of a ditch, was struck by an automobile, driven by Alexander A. Bore, 502 Third avenue, West Orange, and crushed against a hydrant. He died in fifteen minutes.

THRENTON, N. J., Aug. 6.—Norman Breese, 28, of New York, was killed by an automobile, driven by his father, Grover Breese, a farmer, and died to-night. Breese had just purchased the automobile. Thinking he would run to the house, he had got into the car, and was about to back out of the garage. His son fell off the running board and under a wheel.

WINSTON LOCKS, Conn., Aug. 6.—Edward Fitzgerald of Suffield was instantly killed this afternoon when an automobile he was driving overturned in a ditch alongside the roadway in this city. A blowout in the front tire caused the accident. Four youths, passengers in the car, disappeared after the accident.

MAN HELD IN KILLING OF WIFE WITH CLOCK

Husband, Clothing Stained With Blood, Found Asleep.

Leo Durnherr, aged 36, a salesman, was held without bail by Magistrate Sweetser in the West Side court yesterday on suspicion of homicide. Durnherr was arrested in front of his home at 100 West 42d street, where he was found by police after a search of the house. He was found with blood on his shirt and trousers, and a blood-stained shirt and trousers were found in the room. Durnherr's wife, Dorothy, was found dead in a room on the fourth floor. Her skull was crushed and her face battered. A heavy alarm clock, smashed and blood spattered on the floor, was found near the body. Durnherr was found in a room at a hotel in West Forty-third street about 4 o'clock in the morning. The detectives entered with a passkey, revolvers in hand, expecting a battle, only to find Durnherr asleep.

Durnherr's shoes, stained with blood, according to the detectives, were on the floor, with his socks, clothed with blood, near by. A shirt and other articles of clothing were bloodstained, the detectives said.

NEGROES HEAR HENDRICK OPEN FIGHT FOR SENATE

Calder's Opponent Threatens to Bolt if Beaten.

Frank Hendrick, member of the Union League Club, urged the negroes to assert their right to be heard in a candidate last year for Judge of General Sessions, opened yesterday his campaign in the United States House of Representatives. In an address before the Equity Congress of Greater New York, a negro civic organization, at 420 Lenox avenue, he declared that he would run as an independent ticket if necessary and that his would be "a campaign of principle."
